

Discord Setup

Download and Installation

You can download the discord app for various operating systems here: <https://discord.com/download>

On Linux, you can also install the discord app via snap:

```
sudo snap install discord
```

Registration

If don't have an account already, click on "register",

you will need a valid e-mail address.

Login

Once you're registered, log in with your username and password.

If you also have the discord app on your phone, you can also scan the QR-code to log in on your computer (e.g. option "Scan QR Code" under "User Settings" in the Android app.)

Connecting to Course Server

You will receive an invitation to the course server via e-mail or rocketchat
