

OMERO search

Step-by-step guide: How can I **search** for data of specific user?

1. In the top bar of the OMERO web page you will find a "Search" field on the right side. There you can enter a full name to search for.
2. You can filter the results for specific groups, object types or other restrictions.
3. Be aware that using wildcards (see yellow box) is possible and might be needed, in case you are not searching for an exact name.

The screenshot shows the OMERO webclient interface with a search query of "Anna Hamacher". The search results are displayed in a table with columns: Type, Name, Acquired, Imported, and Group. The results list various datasets and projects associated with the user Anna Hamacher.

Search Bar: The search bar at the top right contains the text "Anna Hamacher".

Search Results Table:

Type	Name	Acquired	Imported	Group
Image	CAI_ITIC_2021_Anna	2021-04-01 09:47:56		CAI_CAI

Search Filters:

- Search:** Anna Hamacher
- Restrict by Field:** Name, Description, Annotations
- Search for:** Images, Datasets, Projects, Wells, Plates, Screens
- Scope:** In group: All Groups, Data owned by: Anna Hamacher
- Date:** Import date

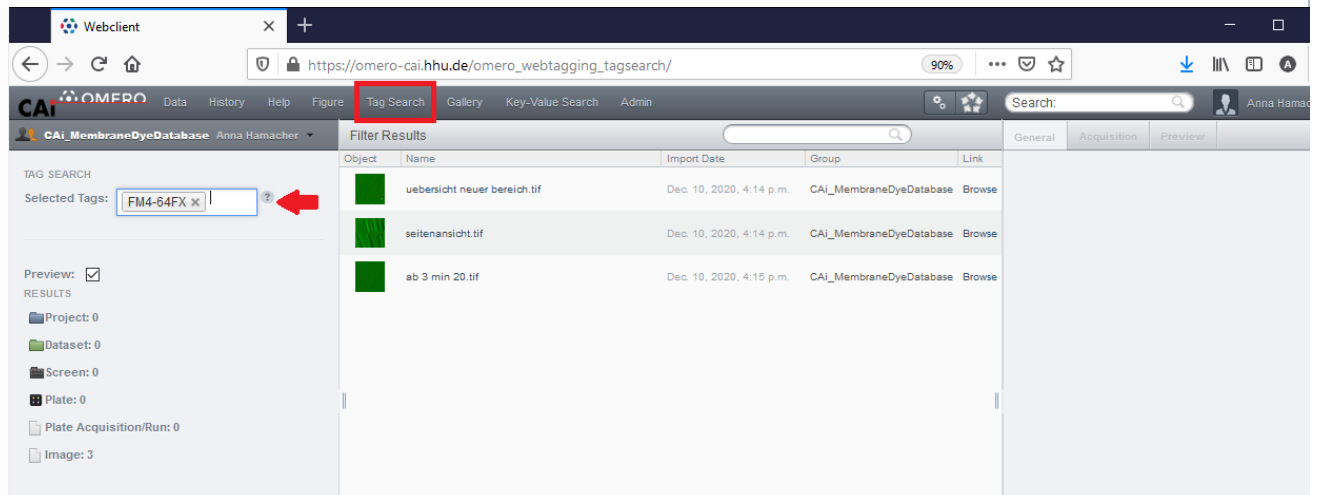

Search Results: More than 520 results

If you are actually not sure who the owner of the data is, you are interested in, you can browse the Data of a group by using the "All Members" navigation.

Alternatively you can use the tag search or key-value search if these annotations are maintained.
